## INTERNSHIPS

---

### Frontend Developer

June 2022 - August 2022

Worked as a Frontend Developer at Business Web Solutions. I was given a set of tasks to complete in a given time frame. During the course of the internship, I got to learn various technologies and got to implement them in my project.

## PROJECTS

---

### Netflix clone UI

[GitHub](#)

Created using React JS library. This project consists of a login, signup and home page of Netflix. It also displays a full screen video.

### DEVel-UP

[GitHub](#)

Created a website called DEVel-UP which is used to connect people in the technology domain and build a community. The user can search a particular tech stack and they will get a list of number of people who are in the same domain. Also, one can also search for candidates who are applying for jobs.

### CRAVE

[GitHub](#)

Worked on a project for reducing food wastage - CRAVE. CRAVE is a website which helps the user to keep track of the expiration dates on different food items. It also has features like recipe searching by an ingredient and a to-do list. The user can also donate raw food to food banks.

## EDUCATION

---

2018 SSC - Swami Vivekanand Internation School (92.60%)

2020 HSC - Shri. T. P. Bhatia College of Science (79.69%)
